SUPPLEMENT TO
REPORT NO.

The Zhdanov naval shipyard is on the northern side of the harbor canal, east of the naval base of LEFAYA (20°55'E/
56°37'N), Latvian SSR.

The shipyard covers an area of about 2,000 x 1,200 feet. Some of the installations existed in 1880. On 1 May 1948, the name Tosmare was changed to Zhdanov. The old buildings were stone structures. The old boat construction shed was destroyed during the war and has not been reconstructed. The shipyard has railroad sidings. The newly constructed power plant was not in operation because the running of the machines made too strong vibrations. For plant layout see Annex.

About 250 men (Soviet Navy personnel), 700 workmen, and 320 PWs worked in one shift.

Repair of ships, including engines, electrical and radar instruments.

This document is hereby regraded to
CONFIDENTIAL in accordance with the
letter of 16 October 1978 from the
Director of Central Intelligence to the
Archivist of the United States.
